Deutsche Messe

En Italian German Exhibition Company Mexico, nos complace darles la bienvenida a la quinta edición de Industrial Transformation Mexico. Un proyecto que representa la unión de esfuerzos por trascender las barreras de los modelos tecnológicos tradicionales para así avanzar a la transformación digital, a medida que ésta se agiliza cada vez más en el panorama global actual.

Es un verdadero privilegio celebrar con todos nuestros expositores, aliados estratégicos y multiplicadores, el evento más ambicioso para la industria en México. En el camino recorrido durante estos cinco años de trayectoria en el País, se ha vuelto imperativo adoptar la agenda digital, la adopción tecnológica y la generación de conocimientos 4.0 para transitar hacia modelos de producción más eficientes y flexibles, descubrir nuevos modelos de negocios, así como abrir espacios diversos para la colaboración ante la llegada inminente de nuevas tendencias y estándares de producción sostenible y digital que perdurarán en esta Cuarta Revolución Industrial.

Por ello, refrendamos nuestro compromiso compartido entre la triple hélice para continuar impulsando la evolución y la innovación de las industrias a fin de forjar un futuro más próspero a través de las soluciones que ofrecen las tecnologías de la Industria 4.0; acelerar la democratización del conocimiento y el acceso tecnológico para que nuestros recursos humanos, empresas e industrias puedan desempeñarse con éxito en el nuevo mundo digital.

Estamos seguros que ITM 2023 será la plataforma que permitirá a nuestras empresas avanzar hacia la era digital; el punto donde se reunirán los tomadores de decisiones más importantes del país para fortalecer la política industrial 4.0; así como ser el espacio donde nuestros talentos jóvenes podrá continuar su proceso de capacitación y crecimiento en el país.

¡Bienvenidos a Industrial Transformation MEXICO 2023!

Azul Ogazón,
Directora de ITM, IGECO

Bernd Rohde,

www.beckhoff.com

Beckhoff implementa sistemas de automatización abiertos en base a la tecnología de control basada en PC. La gama de productos abarca los siguientes segmentos principales: PC industriales, componentes de E/S y de bus de campo, tecnología de accionamiento, software de automatización, automatización sin armarios de control y hardware para el procesamiento industrial de imágenes. Para todos los segmentos hay líneas de productos disponibles, que funcionan como componentes individuales o en combinación, como un sistema de control completo y coordinado. Nuestra «New Automation Technology» (Nueva Tecnología de Automatización) es sinónimo de sistemas de control y automatización universales e independientes del sector, implementados en las más diversas aplicaciones a nivel mundial, desde la máquina herramienta controlada por CNC hasta el control inteligente de edificios.

Beckhoff implements open automation systems using proven PC-based control technology. The main areas that the product range covers are industrial PCs, I/O and fieldbus components, drive technology, automation software, control cabinet-free automation, and hardware for machine vision. Product ranges that can be used as separate components or integrated into a complete and mutually compatible control system are available for all sectors. Our New Automation Technology stands for universal and industry-independent control and automation solutions that are used worldwide in a large variety of different applications, ranging from CNC-controlled machine tools to intelligent building control.

Somos una empresa pionera en el desarrollo del talento intelectual infantil, especializada en fusionar tecnología y creatividad para formar a la próxima generación de innovadores y programadores. Nuestra singularidad reside en la implementación de tecnologías avanzadas como Arduino y metodologías creativas como LEGO Serious Play e lungo, nuestra propia metodología diseñada para estimular el pensamiento creativo. Con más de 45 proyectos Arduino diseñados en casa, brindamos a los niños una experiencia educativa completa que les permite aplicar teorías en escenarios prácticos. Nuestra iniciativa más reciente se centra en desarrollar el pensamiento de programador en niños con perfiles específicos, estructurada en tres etapas evolutivas.

We are a pioneering company in the development of children's intellectual talent, specialized in merging technology and creativity to shape the next generation of innovators and programmers. Our uniqueness lies in the implementation of advanced technologies like Arduino and creative methodologies like LEGO Serious Play and lungo, our own methodology designed to stimulate creative thinking. With over 45 in-house designed Arduino projects, we provide children with a comprehensive educational experience that allows them to apply theories in practical scenarios. Our most recent initiative focuses on developing programming thinking in children with specific profiles, structured in three evolutionary stages.

El Clúster de Tecnologías de la Información de Guanajuato A.C. es un organismo destinado a fortalecer la política industrial del sector de Tecnologías de la Información y Comunicaciones en el Estado de Guanajuato. Está conformado por las empresas más competitivas de la región y es parte fundamental de la estrategia de clusterización del Estado de Guanajuato. Articulamos a los sectores estratégicos nacionales e internacionales con el mercado local. Dinamizamos el mercado interno y favorecemos la exportación de software y servicios de tecnologías de información.

The Information Technology Cluster of Guanajuato A.C. is an organization aimed at strengthening the industrial policy of the Information and Communications Technology sector in the State of Guanajuato. It is composed of the most competitive companies in the region and is a fundamental part of the clusterization strategy of the State of Guanajuato. We connect strategic national and international sectors with the local market. We stimulate the domestic market and promote the export of software and information technology services.

Cámara Nacional de la Industria Electrónica de Telecomunicaciones y Tecnologías de la Información

E40

Blvd. Campestre 2150, Bosques del Refugio, 37150, León, Guanajuato, Mexico

Adriana Valdivia
Directora General
4773934644
direccion.guanajuato@canieti.com.mx
<https://www.canietiguajauato.com/>

La Cámara Nacional de la Industria Electrónica de Telecomunicaciones y Tecnologías de la Información cuenta con más de 80 años de vida en nuestro país, convirtiéndose en una entidad representativa de los tres sectores, promoviendo su desarrollo en un entorno global con servicios de alta calidad. Es una institución de interés público, autónoma, con personalidad jurídica y patrimonio propio, diferente al de cada uno de sus afiliados; constituida conforme a lo dispuesto en la Ley de Cámaras Empresariales y sus Confederaciones. Nuestro propósito principal es lograr el desarrollo competitivo de la Industria Nacional con sentido gremial y responsabilidad social. Desde el 2003, CANIETI ha recibido 8 veces el Premio Nacional de Ética y Valores otorgado por la Confederación Nacional de Cámaras Industriales (CONCAMIN). El cual es otorgado al organismo que demuestra un compromiso y una responsabilidad social tanto para con sus afiliados como con la sociedad en general. En CANIETI, se afilian las personas físicas o morales establecidas legalmente tanto en la República Mexicana como en el extranjero, que se dedican habitualmente a actividades relacionadas con el sector electrónico, de telecomunicaciones o de Tecnologías de la Información. La Cámara está integrada por más de 1000 empresas afiliadas en todo México, agrupadas para defender y vigilar sus derechos e intereses comunes.

The National Chamber of Electronics, Telecommunications, and Information Technology Industry has over 80 years of existence in our country, becoming a representative entity of these three sectors, promoting their development in a global environment with high-quality services. It is a public interest institution, autonomous, with legal personality and its own patrimony, distinct from each of its affiliates, established in accordance with the provisions of the Law of Business Chambers and their Confederations. Our main purpose is to achieve the competitive development of the National Industry with a guild focus and social responsibility. Since 2003, CANIETI has received the National Ethics and Values Award from the National Confederation of Industrial Chambers (CONCAMIN) eight times, which is granted to organizations that demonstrate a commitment and social responsibility to both their affiliates and society at large. At CANIETI, individuals and legal entities established both in Mexico and abroad, who are regularly engaged in activities related to the electronic, telecommunications, or Information Technology sectors, are affiliated. The Chamber is composed of more than 1,000 affiliated companies throughout Mexico, grouped together to defend and safeguard their common rights and interests.

Finder nació en 1954 gracias a la intuición de Piero Giordanino, fundador de la compañía, quien en 1949 patentó el primer telerruptor moderno. Hoy, la compañía, gracias a importantes raíces italianas, ha adquirido una dimensión internacional, produciendo más de 14 500 componentes electrónicos y electromecánicos para el sector civil e industrial en su totalidad en Europa, en las plantas italianas, francesas y españolas. Un crecimiento continuo y constante, siempre basado en el concepto de originalidad, que hoy distingue a Finder como uno de los productores con el mayor número de aprobaciones y certificaciones en el mundo.

Finder was founded in 1954 by Piero Giordanino, who patented the first step relay in 1949.

Today Finder produces over 14,500 different types of electromechanical and electronic devices for the residential, commercial and industrial sectors, all of them manufactured in our European facilities in Italy, France and Spain. Over the years the company has continued to expand and is now truly global. Finder is proud to be recognized as the relay manufacturer with the highest number of quality approvals.

KNIPEX es el fabricante de alicates para profesionales líder a nivel mundial. Con más de 1600 empleados en Alemania y 140 años de historia, KNIPEX diseña y fabrica soluciones innovadoras que permiten trabajar de forma más eficiente, fácil y segura. La funcionalidad y durabilidad de los alicates KNIPEX ahorran mucho tiempo que, de otra manera, se perdería en el cambio de herramientas. Además, los alicates especiales facilitan el trabajo rápido, incluso en las tareas más complicadas. Son un verdadero apoyo para alcanzar la máxima productividad posible. Los productos KNIPEX son fabricados exclusivamente en sus instalaciones de Wuppertal, Alemania.

KNIPEX is the leading manufacturer of pliers for professional users throughout the world. With 1,700 employees in Wuppertal, solutions are developed and produced to achieve effective, easy and safe working. The basic idea of KNIPEX is to focus: As pliers specialists, we offer our customers top performance and set standards in global competition. In over 140 years, we have developed an extensive know-how of pliers and manufacturing, which can be found in each of the more than 1000 KNIPEX products - the widest range of all pliers manufacturers! This makes KNIPEX the world's leading pliers brand with tools for gripping, cutting, shaping and numerous special applications: from small precision electronics pliers to half a meter long water pump pliers for the installer. KNIPEX innovations such as the pliers wrench are often copied - but never matched in quality.

Modula es una empresa italiana que diseña y fabrica soluciones automáticas para el almacenamiento desde 1987. Desde hace años, Modula es sinónimo de almacén automático vertical y es una de las marcas líderes en este negocio. Pero la gama de los productos se ha ampliado con el paso de los años, incluyendo también almacenes automáticos horizontales, soluciones de picking que optimizan las actividades de preparación de los pedidos, software WMS de gestión del almacén e integraciones robóticas. Nuestros procesos productivos, de alto contenido tecnológico, reflejan nuestra vocación por la innovación y nos permiten transferir valor a nuestros clientes, en cualquier parte del mundo.

Modula has been synonymous with the vertical automated warehouse for years and is one of the leading brands in this business. But the range of products has expanded over the years, including also horizontal automated warehouses, picking solutions that optimize order preparation activities, WMS warehouse management software and robotic integrations. Our productive processes, with a high technological content, reflect our vocation for innovation and allow us to transfer value to our clients, anywhere in the world.

Patlite es una empresa japonesa que ofrece equipos de última generación para las industrias de procesos y automatización industrial desde 1947. Los innovadores equipos están diseñados para ser duraderos y de una alta calidad respaldada por años de experiencia en la industria. Patlite tiene un fuerte compromiso con la seguridad y la protección, por lo que se ha convertido en el fabricante de dispositivos de señalización visual y audible más conocido a nivel global.

Patlite is a Japanese company that offers state-of-the-art equipment for the process and industrial automation industries since 1947. The innovative equipment is designed to be durable and of a high quality backed by years of experience in the industry. Patlite has a strong commitment to safety and security, which is why it has become the best-known manufacturer of visual and audible signage devices globally. As the industry's signage needs shift from simple lights and buzzers to network-capable smart devices, Patlite provides a variety of products ranging from wireless data acquisition systems, programmable signal towers, IO-Link and POE devices, and more. The company's products and services help improve quality control, productivity and safety of industrial automation.

WWW.TBSEK.MX

En TBSEK, somos un grupo de profesionales del área de la seguridad informática con más de 25 años de experiencia.

Hemos entendido que solo gastar en seguridad, sin tener la visibilidad completa y continua de lo que sucede en la red, siempre representará un gasto excesivo y poco efectivo. Por esta razón, en TBSEK nos especializamos en el desarrollo de estrategias de CiberSeguridad, y Gobierno de la Información que mantengan la continuidad del negocio de nuestros clientes, utilizando servicios que dan la visibilidad necesaria para predecir, detectar y responder inmediatamente a posibles incidentes. A su vez, permiten priorizar la inversión en soluciones de CiberSeguridad de una manera más eficiente. Lo anterior a través de una constante innovación en servicios, así como integrando los productos y marcas que permitan agregar mayor valor en cada uno de nuestros proyectos.

At TBSEK, we are a group of professionals in the area of information security with more than 25 years of experience. We have understood that just spending on security, without having complete and continuous visibility of what is happening on the network, will always represent excessive and ineffective spending. For this reason, at TBSEK we specialize in the development of CyberSecurity and Information Governance strategies that maintain the continuity of our clients' business, using services that provide the necessary visibility to predict, detect and respond immediately to possible incidents. In turn, they allow prioritizing investment in CyberSecurity solutions in a more efficient way. This is done through constant innovation in services, as well as integrating products and brands that allow adding greater value to each of our projects.
